

Here And There Around World

A Fat MAN May Be Lonesome, But WOMEN Get the SRO Sign

SNAPSHOTS AT THE DAILY FAT-FIGHTING CLASS OF NEW YORK'S TOO-PLUMP WOMEN, HELD UNDER THE DIRECTION OF THE HEALTH DEPARTMENT

She Wields a Wicked Whip

Mrs. Ruby Deardorff, beauty of Tulsa, Okla., horsewhipped a man with a three-foot lash. She said he made an uncomplimentary remark about her.

New Duchess' Hobby

The Duchess of Marlborough has taken up private movie production. Here she is taking motion pictures at Belvoir Palace. She may produce a film showing the story of the Marlborough family. The duchess was formerly Gladys Dawson of Boston.

New U.S. Favoy and Wife

J. R. Cottrell, just appointed ambassador to Bolivia by President Harding, and Mrs. Cottrell escaped outside the Capitol at Washington where for several years Cottrell has been a member of the House press gallery.

Carrying His Alligator "Bag."

Some day when the wife wants an alligator pocketbook or a gator bag and you go out and catch the beast for the hide, you may not know how to carry it. Study the rope arrangement this professional gator hunter of Southern Florida has hitched on his catch.

Hit 'Em Hard!

Barney Trafton, star Cubbie-leoper, using harness devised by Cubbie-coach, to develop better line-hitting.

An Exciting Struggle

An exciting moment in the horse tournament at Kew, England, held by the Chiswick Ladies Hockey Club. Note the ball in the air.

Gauge Records Hardest Rains

A new rain gauge for measuring the amount of rain or snowfall has been invented by experts of the U. S. Weather Bureau. It is of greater accuracy and capacity than any of the devices used hitherto and can be used in regions of excessive moisture and large rainfall where conditions are not favorable for the use of ordinary recording gauges.

Under such circumstances, the new mechanism can be arranged to record data daily, weekly or monthly.

This is effected by means of a clock arrangement which functions with a single winding over any period of time desired, up to 14 months. Evaporation is prevented by the application of a layer of oil over the water collected in the receiver.

Taken on Chart.

The weighing mechanism consists of a pair of levers and a strong spring which supports the receiver when rain and snow are collected. It is connected with the recording pen, but all variations and movements of the scales are registered on the record chart.

The recording pen is so adjusted that it can cross and crossover the record book four times, which is adequate for registering an extremely large rate of rain.

The record sheet has to be changed off at the end of each month, whether one or several days duration.

Large Capacity.

The gauge is arranged so as to measure as much as 2 inches or 50 millimeters of rain or snowfall as well as 10 millimeters of the various storms as their 5 minutes.

The sensitivity of the gauge board is 100 millimeters of rain or snowfall—considerably more than that caused by an ordinary storm in this country.

For Harding

William P. Feltner, of San Francisco, presented this heart to President Harding as an inscription to the Shriners' luncheon in 1922. The president closed it, thus signifying his intention to return.

Love's Dream

Miss Mary, Queen of Sheba, dressed in traditional attire, was a nurse and helped to care for the wounded. Now she is married to Herbert M. Hartman, millionaire.

Pershing Honors Unknown Hero

Impressive ceremonies were held in London when General Pershing placed a wreath, an American mark of honor, on the tomb of Great Britain's Unknown Soldier.

Double-Barreled Tug-o'-War

Douglas A. MacArthur, right, and his son, Douglas Jr., left, are shown playing the tug-of-war. The winning team must keep its feet, and get out, as far as possible before regaining the mark.

Royalty at Battle Front

King Constantine and Queen Sophie at the Greek battle front in Asia Minor. The queen visited many of the hospitals and assisted in nursing the wounded.
